

To Our Patients

Thank you for allowing us to provide medical care to you and your family. Providing quality care to each of you based on your individual needs and desires is a responsibility we take very seriously.

You may have heard about recent efforts by insurance companies in Georgia to “rate” physicians, based on the quality of care the physician provides. However, it is important for you to know these systems often rate quality based on cost using computer programs that look at numbers and dollar amounts. For example, some systems also include hospital costs, which are beyond the control of the physician. This is not the best way to judge whether or not you receive “quality” care—no cost-based computer program in the world can do that.

As a patient, you need confidence that your physician will provide you with the best medical care and not simply the cheapest. The easiest way to provide cheap health care is to provide less health care—and that is not fair to you.

Our practice supports scientific efforts designed to improve health care quality, and the Medical Association of Georgia, in conjunction with the American Medical Association, has established appropriate guidelines to measure physician quality.

Please let us know if you have any questions about the medical care you receive in our office.

Our No. 1 goal is to provide you with quality medical care.
